

Packaging specifications for PAKT cleaning services

PAKT aims to clean as many packages as possible for reuse. We are capable of processing packages that meet the specifications listed below. For other types of packaging, additional tests are required. If your packaging does not meet one or more of these specifications, we are happy to discuss alternatives with you.

Call +31 (0)6 14 18 83 34 or send your questions to info@paktpackaging.com.

Packaging Type

Material: **Glass**

Contents: **Food** and **beverages**

Dimensions: **54-89mm** diameter, length: **100mm-335mm**

Closure: **Screw caps, snap-on caps, clamp caps, or corks**

Label

Not all labels are suitable for reusable glass packaging. Certain types of labels create paper sludge, which can clog our cleaning systems and lead to malfunctions and expensive repairs. That is why it is standard at PAKT to conduct a test to see if the labels come off properly. Are you unsure if your label/glue is suitable for reuse? Or do you need help choosing the right label? We're here to assist! We have a network of multiple suppliers with labels suitable for our cleaning process.
